

FEATURE-RICH

Backup and restore data from virtually any environment, quickly and with advanced search capabilities.

PEACE OF MIND

Your data is always available, always protected and recoverable in minutes not hours or days.

COST EFFECTIVE

Enterprise-class data backup and recovery, business continuity for productivity – all at SMB prices.

Ensure your data is always safe, protected, and easily restored.

ARCO Backup and Disaster Recovery

Did you know that 82% of organizations suffered a disruptive event (data loss, downtime, cyberattack) in the last 12 months.¹ The ARCO Group can help.

Our unified Backup and Disaster Recovery solution provides *complete coverage* for Office 365, SharePoint, Teams, G Suite, Salesforce, and other SaaS applications. Your business-critical data is backed-up daily, and backups can be monitored and restored easily - within minutes instead of hours or days.

Business Continuity ensures employee productivity

Downtime is painful and costly. ARCO Backup and Disaster Recovery (BDR) provides flexible, scalable data protection against the most common causes of data loss and downtime - from human error, programmatic errors and accidental deletion to ransomware attacks, malware, viruses, and more.

Key Features

The ARCO Group takes a multi-layer approach to protecting your data. Powered by ARCO Cloud, we encrypt your data and replicate it between multiple, highly secure data centers. This solution also automates key tasks and provides support for diverse environments and workloads. ARCO Backup and Recovery provides:

- **Advanced Data Verification** with automated recovery-point integrity by TruVerify™.
- **NOC-assisted data recovery and testing**
- **Block-level encryption** for more efficient storage and resource utilization
- **Instant Virtualization** – providing ultra-fast data recovery that you can measure in minutes, not days.
- **SaaS data backup** with unique search capabilities across your backups that enable you easily find and restore specific documents.
- **Multiple cloud storage options** –pooled, fixed and long-term storage options via the ARCO Cloud.

Benefits

With The ARCO Group, you can achieve reliable business continuity and meet your Recovery Time Objectives (RTO) and your Recovery Point Objectives (RPO). Your data is protected at rest, in transit and in the cloud with AES-256 level encryption. If you are hit with a Ransomware, we can roll back and recover your data to the last clean backup before the attack. Enjoy peace of mind knowing that our solution also provides your company with these additional benefits:

- **Employee productivity** because of reliable uptime from always-on, always available, and always protected systems.
- **Tested** - our solution is integration and scale tested, as well as proven on over 250,000 servers worldwide.
- **Peace of mind** knowing that ARCO BDR provides continuous data protection.
- **Compliance regulations** will no longer be a concern because we help you meet your uptime objectives.
- **Scalability** – we keep your data safe as your business grows as well as during seasonal business fluctuations.

The ARCO Difference

- **Consultative Approach** - We work closely with you to understand your business and technology needs, then partner with you to help achieve your goals.
- **Latest technology** - ARCO ensures that you receive the benefits and performance of the latest technology, housed in state-of-the-art datacenters for maximum uptime and security.
- **Talented staff** – ARCO only hires experienced Technical Consultants based in the U.S. to provide you with world-class IT services and IT support.
- **Experience** – For over fifteen years The ARCO Group has provided IT services to small and mid-market businesses across a wide variety of industries in the Jacksonville FL, and Pittsburgh PA metroplexes, as well as across the U.S.
