

CONNECTED

Call, chat, & text with coworkers.
Host an ad-hoc or scheduled
video conference from one app

PRODUCTIVE

Connect with available co-
workers, share files securely &
work on projects in real time

EASY-TO-USE

Intuitive user design, seamless
experience using the device
of your choice

ARCO Elevate Unified Communications promotes
collaboration, regardless of your employees' locations

ARCO Elevate Desktop App

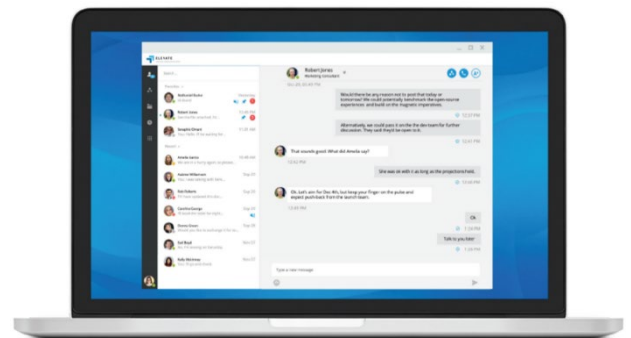

Our solution brings essential collaboration and communication tools together securely, making teamwork easier than ever. See who is available, chat and text with coworkers, place and receive calls from your desk or mobile phone, screen share, hold video conferences and share files—all from one application. Your staff will have no problem getting started since Elevate is downloadable as an app for PC and Mac®.

Communicate your way – on any device

Have the flexibility to use your desktop application to place and receive calls - either as an associated desk phone or as a softphone from your PC or Mac. Simply download the mobile app to take your contacts, files and conversations with you – wherever you are.

One application for collaboration

Check coworker availability, place a phone call, start team chat, launch a video conference, and share work together on documents in real time.

The ARCO Difference

At The ARCO Group we take a consultative approach to understanding your business goals and solving your IT challenges. Our experienced staff will partner with you to implement a secure solution and the features that fit your communications needs and workplace best.

Features and Benefits

ARCO Elevate beats the competition in the breadth of features offered and the secure platform on which it's built. Remote workers or workers who switch between corporate and personal devices often unknowingly attract cyber criminals. With ARCO Elevate, which uses SSO, your data, network, your employees and your data remains safe.

ENTERPRISE CALLING FEATURES

- Place & receive calls through the app using your computer and associated microphone & speakers, or as a controller for your desk phone.
- Transfer active desk phone calls to your mobile phone without losing the call.
- Full call history for the last 90 days stored on Elevate.

TEAM CHAT AND SMS

- Send and receive chats in real-time with team members (individuals and groups).
- Elevate instantly synchronizes mobile and desktop chat messages.
- Access full contact chat history.
- Manage all your contacts – company, customer, and personal – from the Elevate Desktop App.

SCREEN SHARING AND VIDEO CONFERENCING

- Launch ad-hoc meetings and use your camera with one click.
- Invite attendees from within the chat conversation to a video conference.
- Seamlessly share your desktop, documents or apps during a video conference.
- Use Screen Annotation to drive meeting engagement.

FILE COLLABORATION

- Access and view the most current version of your company files.
- Multiple team members can work concurrently on documents via file sharing.
- Share files easily and securely from within the mobile app.
- Maintain full control over files, users, devices, and sharing activities.
